THIRTY-FOURTH DAY, FEBRUARY 16, 2008

so this is a good faith question. What body of government decides where we are going to be putting these stops. I mean how do I know that is just isn't where you want them. You say in front of a house of a disabled person, well, does that mean if they don't have a safe spot in front of their home they would have to go some...? I'm not sure how this is going to be executed."

Senator Haugen: "Well, actually it's going to be our very safe bus drivers and all of our transit districts. It's not going to be willy nilly. They are going to pick people up everywhere. They won't be stopping where there is no shoulders but I will say that in some areas in the state of Washington there are some shoulders. There's some areas where people can get on and they don't have to go down to another spot which may be far away, but, believe me, this is done in a very safe manner. This is being done right today. All this does is authorize them. Perhaps your system, which is probably a big system, doesn't respond like the rest of our very small systems who really know the people. They arrange to pick them up. So, I don't think you're going to see it happening willy nilly across the state. I urge your support."

MOTION

On motion of Senator Murray, Substitute Senate Bill No. 5363 was substituted for Senate Bill No. 5363 and the substitute bill was placed on the second reading and read the second time.

MOTION

Senator Murray moved that the following striking amendment by Senators Jacobsen and Haugen be adopted:

Strike everything after the enacting clause and insert the following:

"NEW SECTION. Sec. 1. It is the intent of the legislature that this act increase the tools available to the state's largest urban area to increase pedestrian and driver safety. More than six hundred pedestrians have been killed on Washington state streets and roadways in the past eight years. The city of Seattle

experiences more than four hundred collisions involving pedestrians each year, and an average of six pedestrian fatalities a year. Excessive driver speed is often cited as a factor in traffic fatalities.

The state's largest urban area is encouraged to use traffic safety cameras for the purpose of detecting speeding violations at locations with the highest pedestrian, bicycle, and vehicular traffic accident history.

Sec. 2. RCW 46.63.170 and 2007 c 372 s 3 are each amended to read as follows:

(1) The use of automated traffic safety cameras for issuance of notices of infraction is subject to the following requirements:

(a) The appropriate local legislative authority must first enact an ordinance allowing for their use to detect one or more of the following: Stoplight, railroad crossing, or school speed zone violations, or speed violations on arterial streets in cities with a population over five hundred thousand only. At a

minimum, the local ordinance must contain the restrictions described in this section and provisions for public notice and signage. Cities and counties using automated traffic safety cameras before July 24, 2005, are subject to the restrictions described in this section, but are not required to enact an authorizing ordinance.

(b) Use of automated traffic safety cameras is restricted to two-arterial intersections, railroad crossings, ~~(and)~~ school speed zones, and arterial streets in cities with a population over five hundred thousand only.

(c) Automated traffic safety cameras may only take pictures of the vehicle and vehicle license plate and only while an infraction is occurring. The picture must not reveal the face of the driver or of passengers in the vehicle.

(d) A notice of infraction must be mailed to the registered owner of the vehicle within fourteen days of the violation, or to the renter of a vehicle within fourteen days of establishing the renter's name and address under subsection (3)(a) of this section. The law enforcement officer issuing the notice of infraction shall include with it a certificate or facsimile thereof, based upon inspection of photographs, microphotographs, or electronic images produced by an automated traffic safety camera, stating the facts supporting the notice of infraction. This certificate or facsimile is prima facie evidence of the facts contained in it and is admissible in a proceeding charging a violation under this chapter. The photographs, microphotographs, or electronic images evidencing the violation must be available for inspection and admission into evidence in a proceeding to adjudicate the liability for the infraction. A person receiving a notice of infraction based on evidence detected by an automated traffic safety camera may respond to the notice by mail.

(e) The registered owner of a vehicle is responsible for an infraction under RCW 46.63.030(1)(e) unless the registered owner overcomes the presumption in RCW 46.63.075, or, in the case of a rental car business, satisfies the conditions under subsection (3) of this section. If appropriate under the circumstances, a renter identified under subsection (3)(a) of this section is responsible for an infraction.

(f) Notwithstanding any other provision of law, all photographs, microphotographs, or electronic images prepared under this section are for the exclusive use of law enforcement in the discharge of duties under this section and are not open to the public and may not be used in a court in a pending action or proceeding unless the action or proceeding relates to a violation under this section. No photograph, microphotograph, or electronic image may be used for any purpose other than enforcement of violations under this section nor retained longer than necessary to enforce this section.

(g) All locations where an automated traffic safety camera is used must be clearly marked by placing signs in locations that clearly indicate to a driver that he or she is entering a zone where traffic laws are enforced by an automated traffic safety camera.

(h) If a county or city has established an authorized automated traffic safety camera program under this section, the compensation paid to the manufacturer or vendor of the equipment used must be based only upon the value of the equipment and services provided or rendered in support of the

THIRTY-FOURTH DAY, FEBRUARY 16, 2008

2008 REGULAR SESSION

system, and may not be based upon a portion of the fine or civil penalty imposed or the revenue generated by the equipment.

(2) Infractions detected through the use of automated traffic safety cameras are not part of the registered owner's driving record under RCW 46.52.101 and 46.52.120. Additionally, infractions generated by the use of automated traffic safety cameras under this section shall be processed in the same manner as parking infractions, including for the purposes of RCW 3.46.120, 3.50.100, 35.20.220, 46.16.216, and 46.20.270(3). However, the amount of the fine issued for an infraction generated through the use of an automated traffic safety camera shall not exceed the amount of a fine issued for other parking infractions within the jurisdiction.

(3) If the registered owner of the vehicle is a rental car business, the law enforcement agency shall, before a notice of infraction being issued under this section, provide a written notice to the rental car business that a notice of infraction may be issued to the rental car business if the rental car business does not, within eighteen days of receiving the written notice, provide to the issuing agency by return mail:

(a) A statement under oath stating the name and known mailing address of the individual driving or renting the vehicle when the infraction occurred; or

(b) A statement under oath that the business is unable to determine who was driving or renting the vehicle at the time the infraction occurred because the vehicle was stolen at the time of the infraction. A statement provided under this subsection must be accompanied by a copy of a filed police report regarding the vehicle theft; or

(c) In lieu of identifying the vehicle operator, the rental car business may pay the applicable penalty.

Timely mailing of this statement to the issuing law enforcement agency relieves a rental car business of any liability under this chapter for the notice of infraction.

(4) Nothing in this section prohibits a law enforcement officer from issuing a notice of traffic infraction to a person in control of a vehicle at the time a violation occurs under RCW 46.63.030(1) (a), (b), or (c).

(5) For the purposes of this section, "automated traffic safety camera" means a device that uses a vehicle sensor installed to work in conjunction with an intersection traffic control system, a railroad grade crossing control system, or a speed measuring device, and a camera synchronized to automatically record one or more sequenced photographs, microphotographs, or electronic images of the rear of a motor vehicle at the time the vehicle fails to stop when facing a steady red traffic control signal or an activated railroad grade crossing control signal, or exceeds a speed limit ((in a school speed zone)) as detected by a speed measuring device."
